About Skyspan Shade

Skyspan Shade is an Australian based company with our head office and factory located in South Brisbane. In business for over 18 years, we are industry leaders in the design, manufacture and installation of commercial and residential shade products.

Our turn key service begins with the designs which are all certified by Structural Engineers and wind rated to meet or exceed Australian standards. The shade products are then manufactured in house to ensure complete quality control and meet installation deadlines. Skyspan Shade also offer a comprehensive after sales service including all aspects of inspection, maintenance and upgrades.

Skyspan Shade is a “preferred supplier” under Q.L.D Local Buy and S.A. LGCS (Local Government Corporate Services) contract for open spaces, parks, gardens and all ability playgrounds, works, goods and services (Contract: BUS 201-0810). Local Buy and LGCS contracts are fully compliant with the requirements of Local Government Act 2009 and the subsequent financial regulations.

Recent growth in the shade structure market prompted Skyspan Shade to open a new office in North America servicing the USA and Canada.

Skyspan Shade’s culture is one of never ending improvement. Our team constantly look for new ways to improve the products we sell, the services we provide and the ongoing relationships with our customers.

Brisbane, QLD, Australia

Georgia, USA

Skyspan Shade Products

Commercial Umbrellas - Architecturally designed, engineered and manufactured in Australia using the highest quality materials to give strength, elegance and durability. Our wind rated umbrellas have led the shade industry for over 10 years.

Tensile Membrane Structures - The architectural grade fabric we use is a classified roofing material. With a supportive structure below the fabric creates a highly stable and uniquely aesthetic design.

Car Park Structures - Providing year round car protection from the elements including rain, sun, harmful UV rays, hail and animal droppings. By combining the long lasting steel frame with the architectural fabric, these structures become highly affordable protection for the motor vehicle industry.

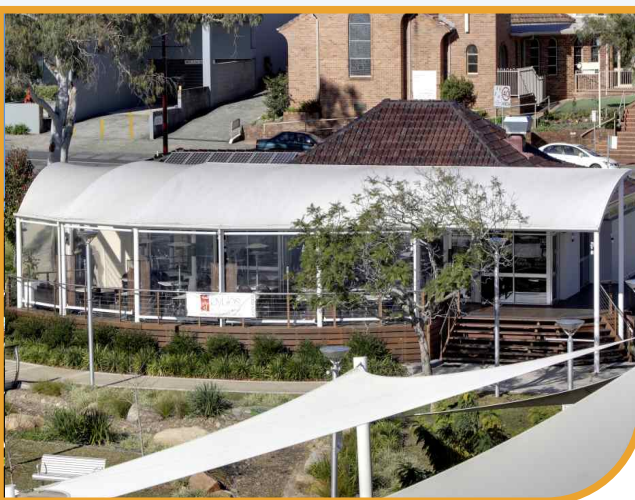

Hypars - Incorporating structural design with innovative looks these light weight structures are a great alternative to umbrellas and shade sails.

Shade Sails - Either water resistant or water proof, shade sails have become an Australian icon. Our shade sails protect people and property from Australia's tough conditions whilst being more aesthetically pleasing than conventional solutions.

Shade Structures - Skyspan Shade have been designing truly unique shade structures for over 12 years. Either water resistant or water proof, these custom structures are a perfect fit for playgrounds, hotels, resorts and other public spaces.

Skyspan Shade Services

Skyspan Shade's suite of services cover the entire spectrum of the shade industry. We are geared to provide our clients with the necessary expertise at each stage of their project from the planning and development right through to implementation and installation. Our company offers a broad range of skills that we tailor to each client's specific requirements and business objectives.

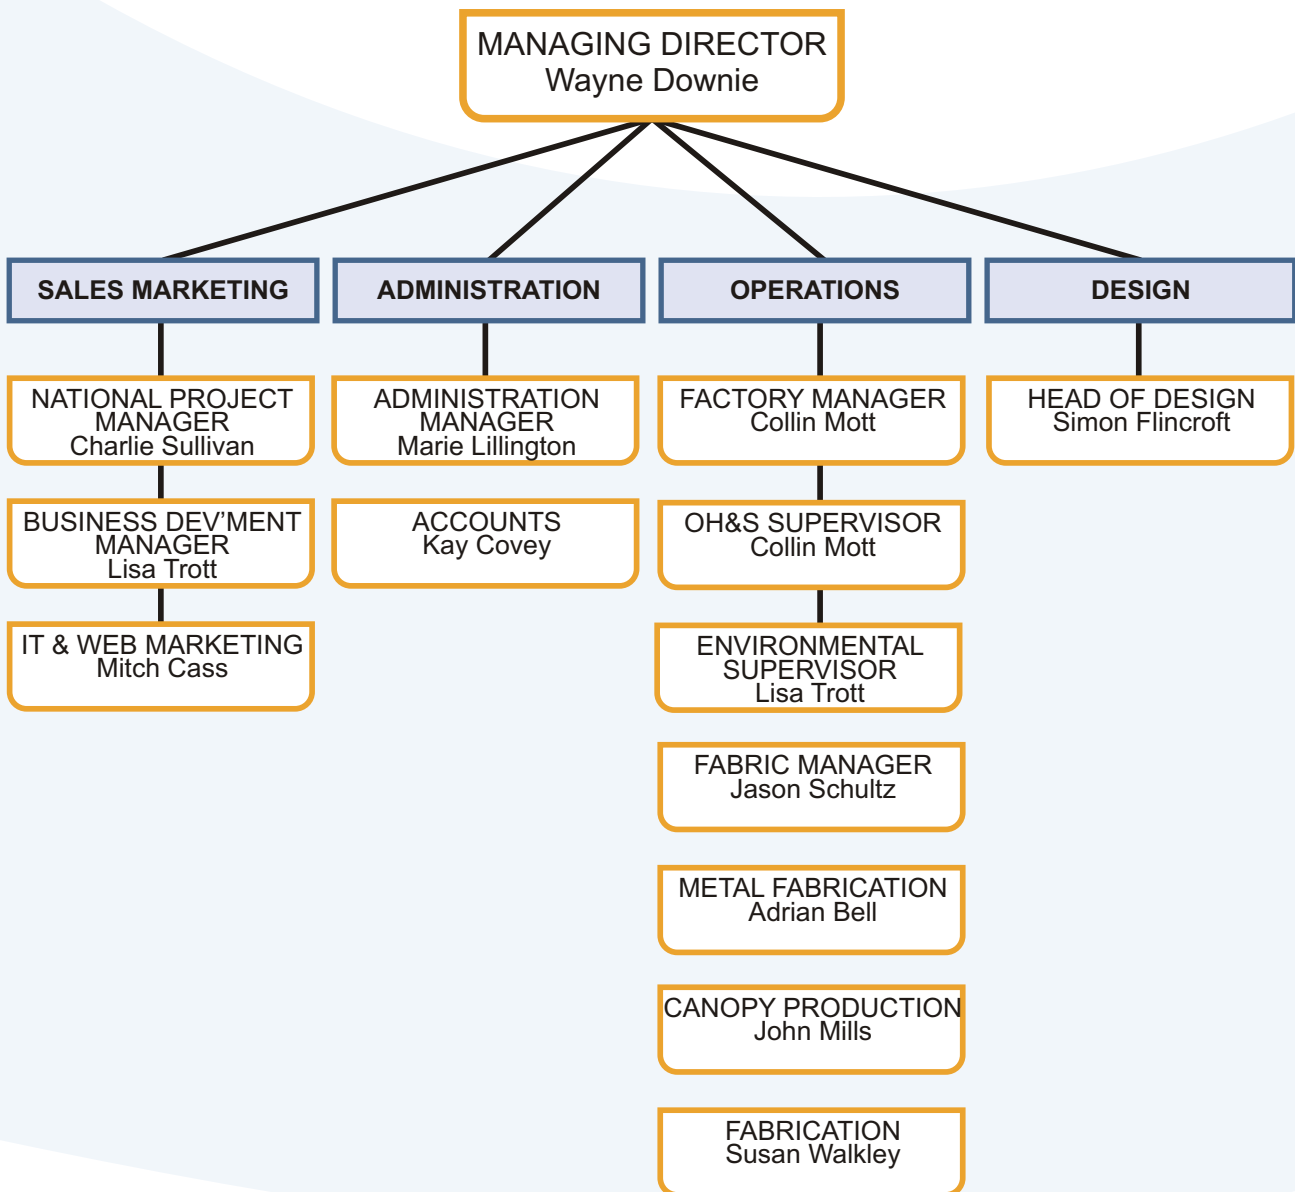

Some of the services we offer include:

- Construction analysis
- Planning of manufacturing process
- Feasibility studies
- Budget planning
- Structural analysis and material selection
- Creation of models and prototypes
- Manufacturing and production of accessories
- Professional installation by qualified tradesmen
- Quality control
- Ongoing service, maintenance and employee training

Skyspan Shade Key Personnel

Skyspan have developed an organisation and management structure that is simple yet extremely effective. Our managers are given high levels of autonomy to operate and form opinions on their business. This line of managing creates proactive and responsive behaviour ensuring a strong sense of commitment in every area of our team.

Management Overview

At Skyspan we consider our most important resource to be our people as it is their effort, talent and creativity that drive our organisation. This is why we place great importance on our ability, as a company, to select, train develop and reward those that work here at Skyspan Shade.

Wayne Downie - General Manager

Wayne's extensive expertise of sales and manufacturing in the shade industry lead the way for our Skyspan team. Wayne is the founding partner of Skyspan and it is his commitment and vision that has seen the company grow from one selling agent to over forty sales agents globally.

Charlie Sullivan - National Project Manager

With 20 years of experience in the Shade Structure industry Charlie has a broad range of experience. Starting in Direct Sales he soon progressed into Product Design developing Skyspan's unique umbrella mounting system still used by the company today. In 2009 Charlie spent 6 months in the USA establishing a new Skyspan facility to service demand both in the US and Europe. Today, Charlie is responsible for National sales working directly with clients to achieve their goals whilst still active in the design and tender process.

Collin Mott - Factory + OH&S Manager

Colin has brought over 18 years experience as a boiler maker and welder to the Skyspan team. His previous experience in fabrication and factory management makes Colin the perfect person to head the manufacturing arm of the business. Colin is also currently completing a certificate IV in Health & Safety and has taken on the additional role of OH+S supervisor for Skyspan Shade.

Jason Schultz - Fabric Manager

Jason has been an integral part of the Skyspan Shade team for many years. He is among the most experienced fabric technicians in Australia having worked at the forefront of tensile membrane design for over 20 years.

Corporate Responsibility

Successful delivery of our projects entails not only best practice in environmental management, design and construction, it also requires the best possible occupational health, safety and welfare outcomes for all participants.

The nature of the industry in which we deliver our product involves special OH&S challenges. Skyspan Management is totally committed to the achievement of the outcomes required through high standards of OH&S management in all areas of Skyspan's endeavours.

Skyspan's Environmental Health and Safety Management System is integrated with our Safety Management System. Environmental issue management during the design and construction of shade project requires:

- Practical experience in the application of environmental protection during construction.
- Design assessment and management tools.
- Assessment and due diligence.

Skyspan Shade provide leadership and safety management expertise to each and every project through the systems and extensive management of the broader company.
